* General Arts And Science

All GAS Programs are grouped under one course due to Ontario Student Loan Categorization.

Important Notes Regarding Above Data

- Student Loan Default Rates

Default rates are calculated based on the last program attended by the student. Students could therefore have outstanding loans brought to Sault College from previous programs and previous institutions.

- Graduate Employment Rates

Graduate employment rate data is collected by a telephone survey. The methodology has some inherent weaknesses in that all graduates must have a valid phone number and the college must have access to the number in order for the survey company to contact graduates. Some graduates who are working may not have updated this important information.

Graduate employment rates are calculated by establishing a 'target week' six months after graduation and administering a telephone survey to determine the graduates status during the 'target week'.

Graduate employment rates may vary considerably between geographical areas due to regional labour market participation rates and youth employment rates as published by HRDC and Statistics Canada.
